

References

Our operators have extensive experience from Subsea projects worldwide, for a great number of different companies.

We also have experience with high quality data collection, processing, modeling and presentation software and methods. These systems are well known and widely used throughout the subsea industry.

Our experienced staff performs efficient processing, interpretation and reporting of our surveys on board the vessels. **BK Marine AS** has wide range of data storage systems maintain full data security and data management, making it possible to supply our customers efficiently. We are also capable of delivering a wide range of recognized CAD and GIS formats.

Project References

Our employees have long experience from manage and supervise subsea projects and problem solving from all over the world. BK Marine’s philosophy is to be a problem solver and take all new challenges in the underwater business and to be able to handle various challenges in the future.
